

Imatest Online Deactivation

Imatest may be installed on several computers, but an ImaTest license can only be activated on one computer at a time. To move ImaTest from one computer to another you first need to deactivate it. If your computer is online you can follow the procedure below. If it's offline, go to [Offline Deactivation](#). After you've deactivated, you'll need to perform [Online Activation](#) or [Offline Activation](#) on the new computer.

Start by opening the **Imatest License Manager** from the ImaTest program group or by clicking **Help, License Manager (Activate)** from ImaTest Master (or other GUI-based versions).

1. Check the circle next to **Yes- Deactivate**.
2. Click **Continue**.

3. **Success!**
