

Imatest Offline Activation

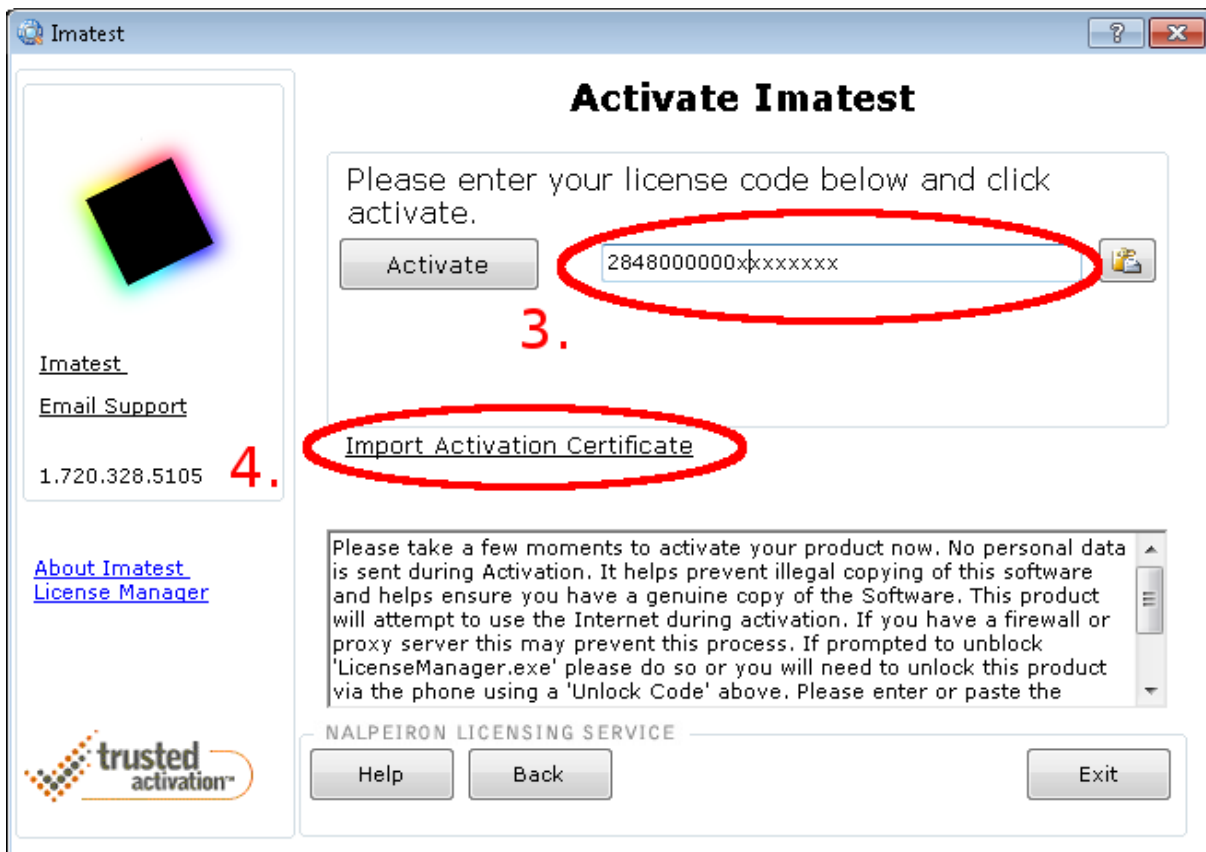

Imatest may be installed on several computers, but an ImaTest license can only be activated on one computer at a time. To run ImaTest, you must activate your license. This page shows how to activate ImaTest software on a computer that is offline— disconnected from the internet or behind a strong firewall that prevents [Online Activation](#). If it's online you can follow the simpler procedure in [Online Activation](#). If you are moving an activation from one computer to another, you'll need to perform [Online Deactivation](#) or [Offline Deactivation](#) first.

Start by opening the **Imatest License Manager** from the ImaTest program group or by clicking **Help, License Manager (Activate)** from ImaTest Master (or other GUI-based version).

1. Choose **Activate ImaTest**.
2. Click on .

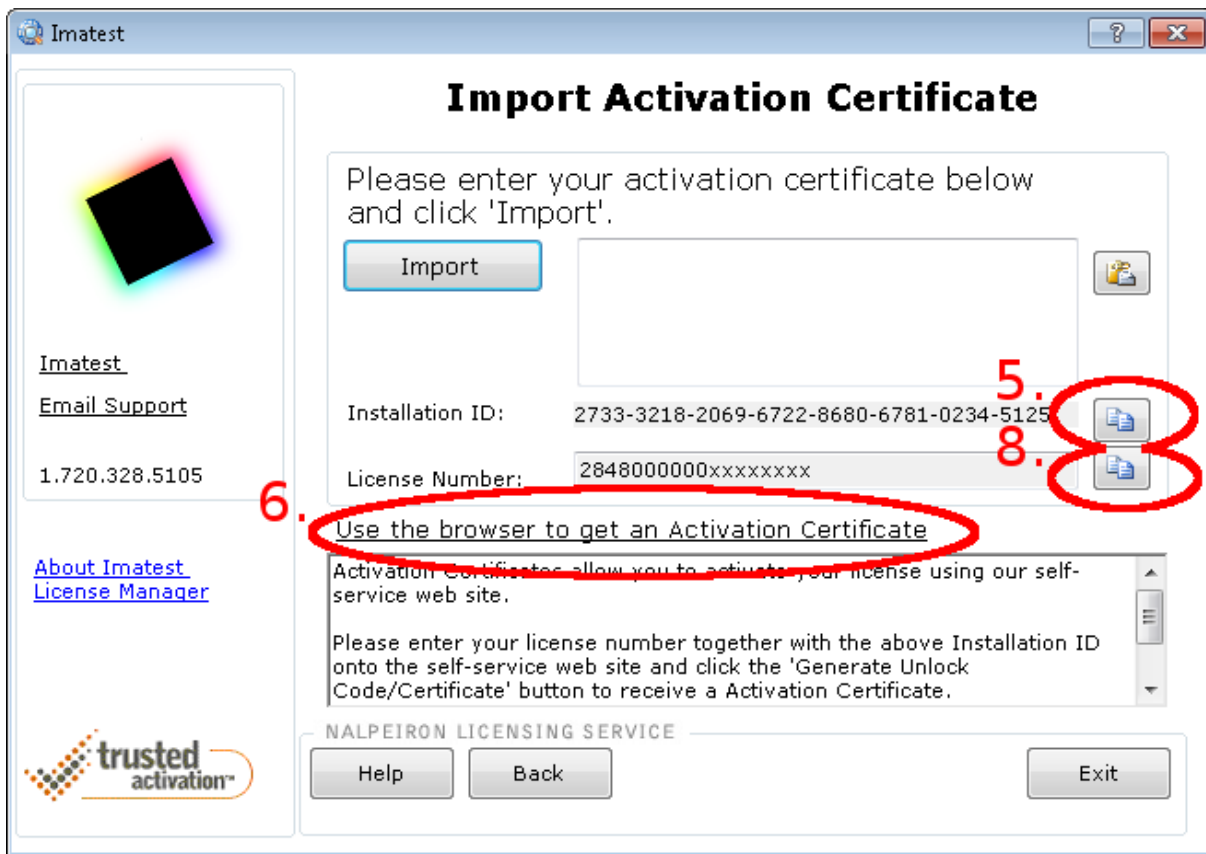

3. Enter the license number you received in your e-mail after purchasing the product (or this will be saved if you have it written to a file License.txt in the same folder as the license manager).
4. Select **Import Activation Certificate**.

5. Copy the **Installation ID** – You can save this to a text file if you want to activate from another machine.

6. Click [Use the browser to get an activation code](#), which will open the Nalpeiron trusted activation web site <https://www.internetactivation.com/ECOSYSTEM/ActivationServer/tiactivate/default.aspx>.

7. Paste the **Installation ID** that you got from the License Manager.
8. Copy the **License Number** from the license manager (above).
9. Paste your **License Number** in the nalpeiron activation web site (below).
10. Check "I have read and agreed to the [terms and conditions](#)".
11. Click .
